

Experiment 3

1) Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

OUTPUT

The screenshot displays the Zoho Creator interface for an application named 'APPROVALPROCESS'. The main form, titled 'Book a Cab', is designed for a 'Car Booking Reservation System'. It contains the following fields:

- First Name (text input)
- Last Name (text input)
- Employee ID * (text input)
- Email Id * (text input)
- Mobile Number * (text input with a dropdown for country code, currently set to +91)
- Gender * (radio buttons for Male and Female)
- Booking Date * (text input)
- Travel Date * (text input)
- Pickup Time * (dropdown menu)
- Pickup Address * (text input)
- Address Line 1 (text input)
- Address Line 2 (text input)
- City / District (text input)
- State Province (text input)

The interface includes a sidebar on the left with a menu for 'space', 'Book a Cab', and 'Bookings'. The 'Book a Cab' option is currently selected. On the right, there is a 'Form Customization - Web' panel showing 'Label placement' options. The bottom of the screen features a status bar with a trial expiration notice: 'Trial expires in 15 days | Upgrade | Get started faster! | Help'.
