

Experiment 4

1) Create a simple cloud software application for Library book reservation system for SIMATS library using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as Title of the book, author, publications, Year, edition, no of copies, Rack no, status (taken/returned) etc.

OUTPUT

The screenshot displays a web browser window with multiple tabs. The active tab is titled 'Zoho Creator' and shows a form for a 'library book reservation system'. The form is titled 'library book reservation system.' and contains the following fields:

- First Name (text input)
- Last Name (text input)
- Actual Return Date (date input, format: dd-MM-yyyy)
- Book ID (dropdown menu, value: -Select-)
- User ID (dropdown menu, value: -Select-)
- Status (dropdown menu, value: -Select-)
- Fine Amount (text input, format: ###,###.##)
- Reservation ID (text input)
- Expected Return Date (date input, format: dd-MM-yyyy)
- Reservation Date (date input, format: dd-MM-yyyy)
- Add your Note here ... (text area)

A blue 'Submit' button is located at the bottom of the form. The browser's address bar shows the URL: https://creatorapp.zoho.in/mohanramaswamy25/library-book-reservation-system/#Form:library_book_reservation_system3. The browser's top bar indicates 'Trial expires in 15 days' and provides links for 'Upgrade', 'Edit this application', and 'Help'.
