

Experiment 5

1) Create a simple cloud software application for Mark Sheet Processing System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as name of the student, Reg no of the student , Subjects , Marks, Average, percentage, rank, overall performance etc.

OUTPUT

The screenshot displays a web application titled "Mark Sheet Processing System" in a development environment. The interface includes a dark sidebar with navigation options: "Mark Sheet" (selected) and "Mark Sheet Report". The main content area, titled "Mark Sheet", contains a form with the following fields:

- Student Name:** Two input fields for "First Name" and "Last Name".
- Registration Number:** A single input field.
- Subject:** A single input field.
- Marks:** An input field with a placeholder "#####".
- Average:** An input field with a placeholder "#####.##".
- Percentage:** A single input field.
- Rank:** An input field with a placeholder "#####".
- Overall Performance:** A dropdown menu with the option "-Select-".
- Student Record:** A single input field.

A blue "Submit" button is located at the bottom of the form. The top of the browser window shows the application title, a "Development" tab, and various utility links like "View as", "Trial expires in 30 days", "Upgrade", "Edit this application", and "Help".
