

CSA15- CLOUD COMPUTING AND BIG DATA ANALYTICS

1. Create a Snapshot of a VM and Test it by Loading the Previous Version/Cloned VM

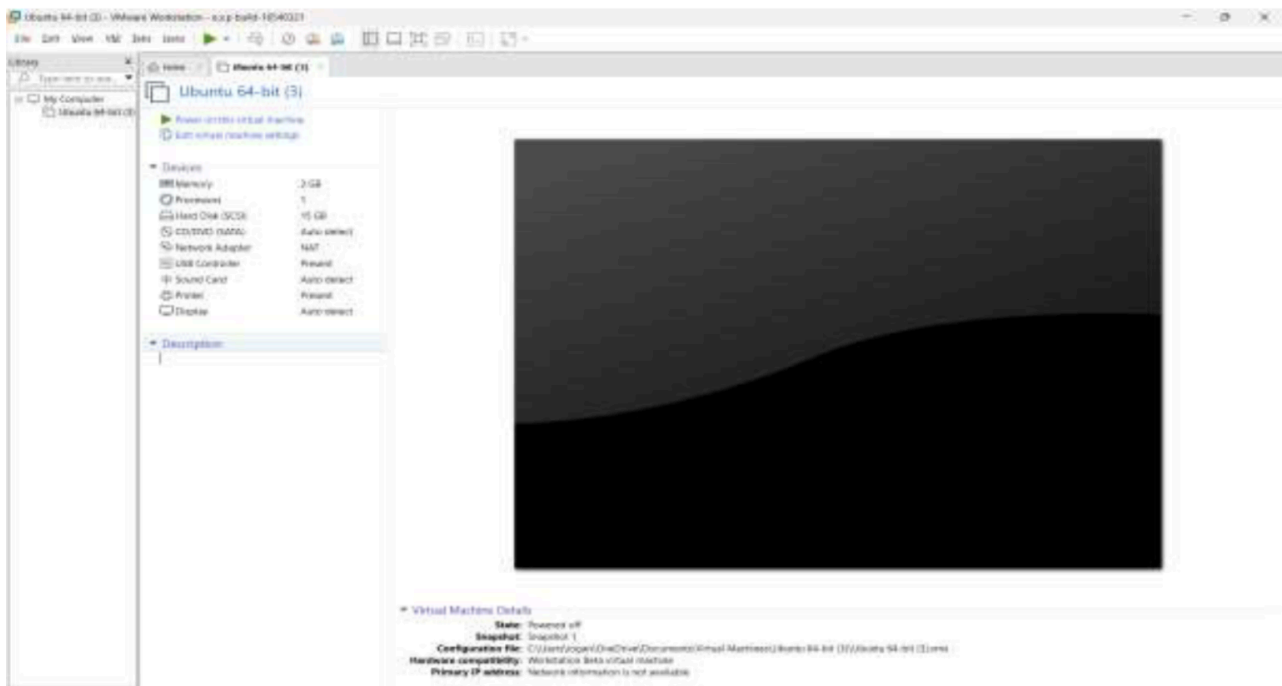

AIM;

To create a snapshot of a virtual machine and test it by loading the previous version of the virtual machine. This follows Experiment 15 in the provided lab list.

Procedure

1. Launch **VMware Workstation**.
2. Open the required **Virtual Machine**.
3. Power on the virtual machine.
4. Make some changes to the virtual machine.
5. Open the **Snapshot** option in VMware Workstation.
6. Select **Take Snapshot**.
7. Enter a suitable name and description for the snapshot.
8. Click **Take Snapshot** to create it.
9. Make some additional changes to the virtual machine.
10. Open the **Snapshot Manager**.
11. Select the previously created snapshot.
12. Click **Go To** to load the previous version of the virtual machine.
13. Confirm the operation and allow the VM to restore the snapshot state.
14. Verify that the virtual machine has returned to the state saved in the snapshot.

OUTPUT

Result

Thus, a snapshot of the virtual machine was successfully created and tested by loading the previous version of the virtual machine.
