

CSA15- CLOUD COMPUTING AND BIG DATA ANALYTICS

1. Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB Storage Disk

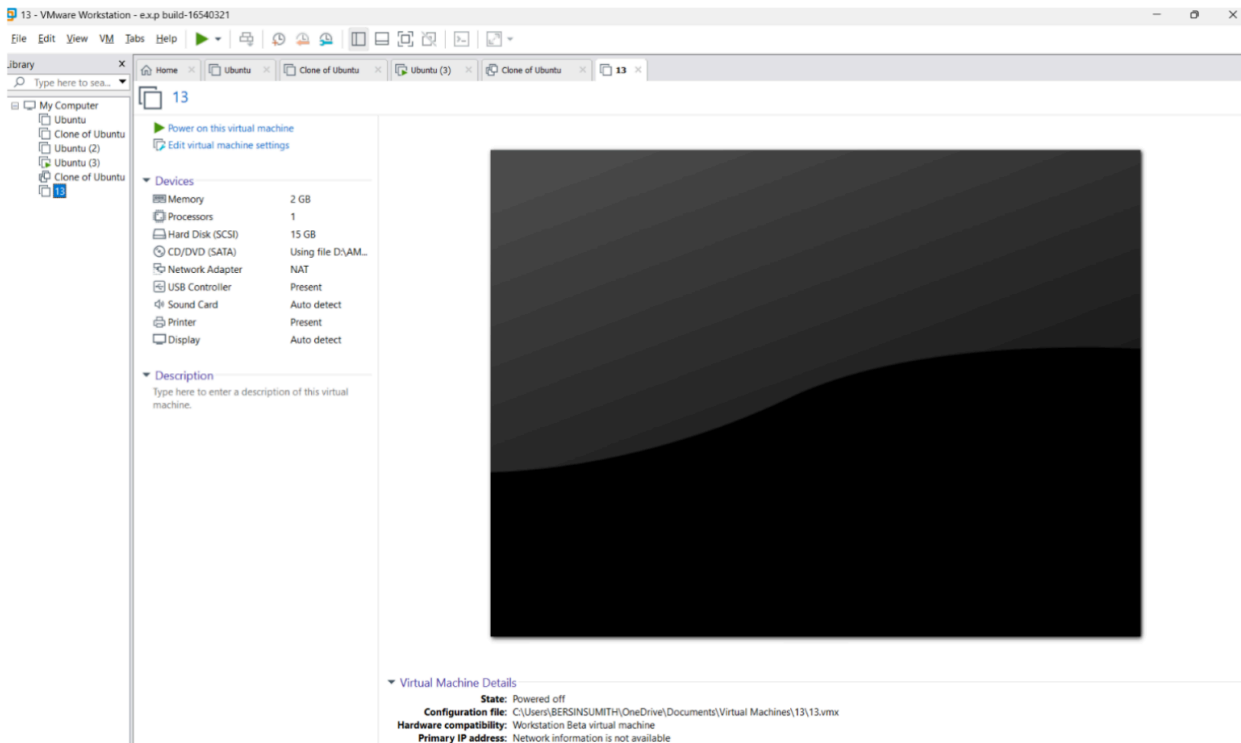

AIM;

To create and configure a virtual machine using Type-2 virtualization software with **1 CPU, 2 GB RAM, and 15 GB storage disk**. The experiment list specifically requires these configurations.

Procedure

1. Launch VMware Workstation.
2. Click Create a New Virtual Machine.
3. Select Typical (Recommended) installation.
4. Select the required Linux/Windows ISO image.
5. Enter the Virtual Machine name and storage location.
6. Open Customize Hardware.
7. Set the Processor to 1 CPU.
8. Set the Memory to 2 GB RAM.
9. Set the Hard Disk capacity to 15 GB.
10. Check the configured hardware settings.
11. Click Finish to create the virtual machine.
12. Power on the virtual machine.
13. Install the selected operating system using the installation wizard.
14. Log in and verify that the virtual machine is working successfully.

OUTPUT

Result

Thus, a virtual machine was successfully created using VMware Workstation with **1 CPU, 2 GB RAM, and 15 GB storage disk**, and the selected operating system was successfully installed and started.
